

CERTIFICATE OF ANALYSIS

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Catalog #: H01426M **Lot #:** 3A02821

Description: MAb to SAA, Animal
Monoclonal Antibody to Amyloid, Serum (SAA), Animal

Specificity: Recognizes the following species of SAA: Canine, Feline and Equine.

Host Animal: Mouse **Isotype:** IgG_{2a}

Source: Ascites

Immunogen: Human SAA

Format: Purified, Liquid

Purification: > 90% pure). Protein A Chromatography

Concentration: 4.9 mg/mL (OD280nm, E^{0.1%} = 1.4)

Buffer: Phosphate Buffered Saline, pH 7.4

Preservative: 0.09% Sodium Azide

Applications: Suitable for use in ELISA and Western Blot. Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded.

Recommended pairs for sandwich immunoassay to detect Canine, Feline and Equine SAA:

<u>Capture</u>	<u>Detection</u>	<u>Antigen for Control (Canine)</u>
H01426M	H01425M	R01771

Do NOT use Bovine Serum Albumin (BSA) in the buffers or for blocking. Instead use Casein. For buffers 1% Casein can be used to replace the BSA.

In assay optimization, use 0.01% CHAPS in antigen dilution and washing buffers. (Tween 20 will either lower the signal or increase non-specific binding.)

Storage: Store at 2-8°C.

Safety Note(s): Refer to the appropriate Safety Data Sheet (SDS) for additional information.

Quality Signature:
