

CERTIFICATE OF ANALYSIS

Important Note: Centrifuge before opening to ensure complete recovery of vial contents.

Catalog #: R02102 **Lot #:** 5E14722

Description: *Mycoplasma pneumoniae* Antigen (FH)
Mycoplasma pneumoniae Antigen, FH Strain

Source: Broth Base Medium
Strain: FH

Format: Purified, Liquid

Purification: Centrifugation and ether extraction.

Concentration: 2.3 mg/mL (Dye Binding Assay)

Buffer: Phosphate Buffered Saline

Preservative: None

Application: This antigen preparation should be sonicated with a microtip immediately prior to use to ensure that the preparation is uniform. This preparation may be used as is in a variety of immunoassay formats or may be further purified to meet the needs of a particular assay format. The antigen may be used for both IgG and IgM detection in assays, which include EIA with polystyrene and latex solid phases. Each laboratory should determine an optimum working titer for use in its particular application. Other applications have not been tested but use in such assays should not necessarily be excluded.

Storage: Store at -70°C. Avoid multiple freeze/thaw cycles.

Inactivation: Ether Inactivation. Effectiveness determined when no detection of growth in two blind passages under the original culture conditions. Result: No growth detected.

Safety Note(s): Refer to the appropriate Safety Data Sheet (SDS) for additional information.
